

# Energy and Infrastructure Projects

---

King & Spalding's energy and infrastructure projects practice includes over 100 lawyers worldwide who specialize in advising clients on world class projects in a range of sectors, including oil and gas, LNG, power, renewable energy, mining, petrochemical, ports and terminals, real estate and social infrastructure.

Our global experience throughout the project value chain gives us an in-depth understanding of the complex interplay among project agreements and how those agreements affect key milestones like development, financing, construction and commercial operations.

Clients count on our team to counsel them on the technical, commercial and geopolitical challenges unique to their projects. We have deep experience negotiating the full range of project development and financing contracts, in a variety of languages, across North America, Latin America, the Caribbean, Europe, the Middle East, Asia and Africa.

Many of the firm's attorneys worked as in-house project counsel or engineers at world-class companies and investment banks prior to joining King & Spalding. Our diverse and specialized experience also includes midstream oil and gas assets (gathering and processing, storage, transport), hydro power, district energy, underground storage, upstream oil and gas, maritime transportation, mining and refining/petrochemicals.
