

Kaleb Walker

Associate
Corporate, Finance and Investments

Houston: +1 713 276 7353
kwalker@kslaw.com

Kaleb Walker represents owners and developers in their on-shore and off-shore construction projects throughout the U.S. and the world, including liquefied natural gas (LNG) export facilities, petrochemical facilities, refineries, power plants, subsea projects, and others, ranging in value from \$100 million to over \$10 billion. Kaleb, who is also trained as a civil engineer, focuses on construction transactions and is experienced in drafting and negotiating a variety of agreements, including front-end engineering design (FEED), engineering-procurement-construction (EPC, EPCM, EP, EPCI), construction, construction management, professional services, master services, and long-term services agreements.

Kaleb advises owners and developers throughout the entire project spectrum, from conception through punch list completion and beyond, including: selecting the appropriate project delivery system and contractual structure; drafting and negotiating FEED agreements and construction-related agreements; drafting and negotiating operation and maintenance agreements and LTSAs; and resolving construction-related disputes. Relying on his former litigation experience, Kaleb helps clients avoid disputes by focusing on issues that create conflict during and after project construction.

Matters

Kaleb has represented owners and developers in a wide range of projects spanning the U.S and the world, including representing the following clients in their LNG, oil and gas, petrochemical, power, subsea, and other projects:

Anadarko as lead associate in the drafting and negotiation of the EPC (on-shore) and EPCI (off-shore) agreements for a first-in-kind, multi-billion dollar liquefaction facility in Mozambique, representing the largest LNG project in Africa.

A **major oil and gas company** in the drafting and negotiation of international master EPCI contracts for the engineering, procurement, construction, and installation of subsea installation projects throughout the world.

Cheniere Energy in connection with its Sabine Pass LNG facilities, representing the first LNG liquefaction project to ever be constructed in the continental United States.

Next Decade in connection with the drafting and negotiation of the FEED and EPC agreements for its Rio Grande LNG liquefaction facility in Texas, valued at nearly \$9.6 billion.

Cheniere Energy in connection with the drafting and negotiation of an EPC agreement for its Corpus Christi LNG liquefaction facility for three LNG trains, valued at \$9.5 billion.

An **owner/developer** in drafting and negotiating FEED and EPC agreements for a multi-billion dollar LNG project in Quebec, Canada.

An **owner/developer** in the drafting and negotiation of engineering and procurement (EP) and construction agreements for a multi-billion dollar petrochemical complex including ethane cracker, polyethylene unit, and aromatics.

An **owner/developer** in the drafting and negotiation of FEED and EPC agreements for a greenfield propane dehydrogenation (PDH) plant in Texas.

An **owner/developer** in drafting and negotiating EPC agreements for a multi-billion dollar petrochemical complex in Alberta, Canada, including propane dehydrogenation (PDH) plant and polypropylene (PP) facility.

An **owner/developer** in drafting and negotiating an EPC agreement for a 1,060 MW natural gas-fired combined cycle power generation facility in Virginia.

An **owner/developer** in drafting and negotiating an EPC agreement for development of a black start facility in connection with existing power plant in Indiana.

An **owner/developer** in connection with the drafting and negotiation of the EPC and long-term service agreement for a natural gas-fired combined cycle power generation facility.

An **owner/developer** in connection with drafting and negotiation of construction agreements for expansion of a methionine feed supplement production facility.

International engineering firm in drafting and negotiating teaming agreements and in resolving teaming agreement disputes.

Municipality as plaintiff in multi-million dollar construction defect and products liability litigation.
